OBJECTIVE

Middle East Technical University Computer Engineering graduate specializing in backend development, AI/ML, and cybersecurity. Experienced in building scalable backend systems, developing and deploying machine learning models, and securing systems through hands-on internships in cybersecurity and autonomous systems engineering. Dedicated to engineering efficient, secure, and high-performance software.

SOFTWARE LANGUAGES

Programming Languages: Python (advanced), C/C++ (advanced), Java, JavaScript, SQL, HTML/CSS
Additional: C#, R, Verilog, AVR Assembly, Prolog, Linux/Unix, Git
Frameworks & Databases: Flask, FastAPI, Node.js, MariaDB, SQL
Cloud & DevOps: AWS, Azure, Docker

EXPERIENCE

C-Prot Cyber Security Systems, Mersin, Mersin University Technoscope **2024/09 – 2024/10**
Cyber Security Engineering Intern

- Developed a C++ application to detect and monitor Bluetooth/USB devices, capturing key connection data.
- Implemented a modular, timestamped logging system with per-device log files for organized tracking and analysis.

Ford Otosan, İstanbul, Sancaktepe **2023/09 – 2023/10**
Autonomous Driving Systems Engineering Intern

- Developed a Python-based tool on Linux to parse and process raw radar and LiDAR sensor data with real-time data pipelines.
- Built modular components for data validation, error handling, logging, and efficient serialization.
- Created an internal employee application using Microsoft Power Apps and Dataverse with automated workflows and intuitive data entry forms.

EDUCATION

Middle East Technical University Northern Cyprus Campus **2019/09 – 2026/06**

- Computer Engineering Department
- Coursework: AI, Computer Vision, NLP, Bioinformatics, Computer Security, Network Systems, Cloud Services, Systems Programming.

PROJECTS

WCAG 2.2 Accessibility Scanner for Turkish Institutions **2026/09 – Present**

- Developed a command-line tool that politely crawls websites, runs **axe-core** on every page, and checks linked PDFs.
- Implemented Turkish report generation in three formats: JSON, a single-file HTML page, and an accessible **tagged PDF**.
- Launched an **accessibility audit and remediation service** for institutions in Turkey, with Erişim as its scanning and reporting core.

MShell: A Custom Unix-like Shell Implementation in Python **2026/05 – 2026/06**

- Developed a fully functional **custom command-line interpreter** in Python, replicating core Linux shell operations.
- Implemented advanced operating system concepts from scratch, including command parsing, multi-stage piping, and I/O redirection.
- Managed process execution and low-level system calls to ensure stable execution during complex command flows.

AI-Powered Food Redistribution Platform **2025/10 – 2026/06**

- Developed an AI-powered surplus food redistribution platform with dynamic pricing, using Antigravity and advanced prompt engineering to accelerate development.
- Implemented a **Random Forest Regressor** achieving 93% accuracy to predict food waste from historical restaurant data.
- Designed an automated **dynamic discount system** based on expiry dates, inventory levels, and demand forecasts, reducing potential food waste by up to 80%.

Security Training Management Application **2025/09 – 2026/01**

- Engineered a cross-platform student management system (Electron, JavaScript, MariaDB) in just one month by utilizing Claude Code and precise prompt engineering.
- Implemented student enrollment, document tracking, and installment-based payments with PDF receipts, automated notifications, and localized Excel form generation.

ATO - Animal Tracking Operations (Start-up Project) **2025/05**

- Developed a **YOLOv11-powered** cow tracking system for barn entry/exit detection, with real-time environmental monitoring via **STM32 sensors** (temp/humidity/CO_2).

CERTIFICATIONS

- **Oracle Cloud Infrastructure AI Foundations Associate** – Oracle (2026/10)
- **Python Essentials for MLOps** – Coursera, Duke University (2026/06)
- **Machine Learning Specialization** – Coursera, Andrew Ng (Stanford University), (2026/04)

LANGUAGES

Turkish (Native), English (Advanced), German (Beginner), French (Beginner)
